

CORD ALGEBRA 1
2nd Edition

correlated to

N.C.T.M STANDARDS
Grades 9-12

NUMBER and OPERATIONS STANDARD	
All students should be able to:	
Understand numbers, ways of representing numbers, relationships among numbers, and number systems	
1. develop a deeper understanding of very large and very small numbers and of various representations of them;	37-43, 44-48, 312-319, 745-746
2. compare and contrast the properties of numbers and number systems, including the rational and real numbers, and understand complex numbers as solutions to quadratic equations that do not have real solutions;	4-37, 76, 206, 645-656, 694-698, 717-721
3. understand vectors and matrices as systems that have some of the properties of the real-number system;	18-19, 32-36, 56-58, 62-63, 72, 76-77, 442-455, 532-543, 554-555
4. use number-theory arguments to justify relationships involving whole numbers.	Throughout the book. Examples: 4-36, 76-77, 80-92, 142, T388
Understand meanings of operations and how they relate to one another	
1. judge the effects of such operations as multiplication, division, and computing powers and roots on the magnitudes of quantities;	Throughout the book. Examples: 80-92, 146-203, 296-303
2. develop an understanding of properties of, and representations for, the addition and multiplication of vectors and matrices;	18-19, 32-36, 56-58, 62-63, 72, 76-77, 442-455, 532-543, 554-555
3. develop an understanding of permutations and combinations as counting techniques.	342-387
Compute fluently and make reasonable estimate	
1. develop fluency in operations with real numbers, vectors, and matrices, using mental computation or paper-and-pencil calculations for simple cases and technology for more-complicated cases.	Throughout the book. Examples: 4-77, 206, 312-319, 442-455, 554-555, 645-656, 694-698
2. judge the reasonableness of numerical computations and their results.	Throughout the book. Examples: 19-20, 40-41, 312-316, 349-355
ALGEBRA STANDARD	
All students should be able to:	
Understand patterns, relations, and functions	
1. generalize patterns using explicitly defined and recursively defined functions;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, T388, T389
2. understand relations and functions and select, convert flexibly among, and use various representations for them;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389
3. analyze functions of one variable by investigating rates of change, intercepts, zeros, asymptotes, and local and global behavior;	146-203, 206-271, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389
4. understand and perform transformations such as arithmetically combining, composing, and inverting commonly used functions, using technology to perform such operations on more-complicated symbolic expressions;	280-339, 442-493, 620-677, 680-741, T388, T389
5. understand and compare the properties of classes of functions, including exponential, polynomial, rational, logarithmic, and periodic functions;	146-203, 206-271, 280-339, 442-493, 496-555, 558-617, 620-677, 680-741, T388, T389
6. interpret representations of functions of two variables	404-410
Represent and analyze mathematical situations and structures using algebraic symbols	
1. understand the meaning of equivalent forms of expressions, equations, inequalities, and relations;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389

2. write equivalent forms of equations, inequalities, and systems of equations and solve them with fluency—mentally or with paper and pencil in simple cases and using technology in all cases;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 680-741, T388, T389
3. use symbolic algebra to represent and explain mathematical relationships;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389
4. use a variety of symbolic representations, including recursive and parametric equations, for functions and relations;	80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389
5. judge the meaning, utility, and reasonableness of the results of symbol manipulations, including those carried out by technology.	Throughout the book. Examples: 80-143, 146-203, 206-277, 280-339, 442-493, 496-555, 620-677, 680-741, T388, T389
Use mathematical models to represent and understand quantitative relationships	
1. identify essential quantitative relationships in a situation and determine the class or classes of functions that might model the relationships;	Throughout the book. Examples: 80-143, 146-203, 206-277, 280-339, 404-410, 442-493, 496-555, 558-617, 620-677, 680-741, T388, T389
2. use symbolic expressions, including iterative and recursive forms, to represent relationships arising from various contexts;	Throughout the book. Examples: 80-143, 146-203, 206-277, 280-339, 404-410, 442-493, 496-555, 558-617, 620-677, 680-741, T388, T389
3. draw reasonable conclusions about a situation being modeled.	Throughout the book. Examples: 80-143, 146-203, 206-277, 280-339, 404-410, 442-493, 496-555, 558-617, 620-677, 680-741, T388, T389
Analyze change in various contexts	
1. approximate and interpret rates of change from graphical and numerical data.	220-233, 249-254, 404-410, 709-716, 722-741
GEOMETRY STANDARD	
All students should be able to:	
Analyze characteristics and properties of two- and three-dimensional geometric shapes and develop mathematical arguments about geometric relationships	
1. analyze properties and determine attributes of two- and three-dimensional objects;	85-92, 97-113, 149-150, 153-154, 174, 297, 307-311, 337, 558, 570, 579, 586-600, 635-636, 646, 664-677, 680-741
2. explore relationships (including congruence and similarity) among classes of two- and three-dimensional geometric objects, make and test conjectures about them, and solve problems involving them;	85-92, 97-113, 307-311, 337, 558, 570, 586-600, 664-677, 680-741
3. establish the validity of geometric conjectures using deduction, prove theorems, and critique arguments made by others;	97-113, 307-311, 337, 496-555, 558-617, 633-677, 680-741
4. use trigonometric relationships to determine lengths and angle measures.	709-716, 722-741
Specify locations and describe spatial relationships using coordinate geometry and other representational system	
1. use Cartesian coordinates and other coordinate systems, such as navigational, polar, or spherical systems, to analyze geometric situations;	4-31, 206-277, 280-339, 496-555, 620-677
2. investigate conjectures and solve problems involving two- and three-dimensional objects represented with Cartesian coordinates.	4-31, 206-277, 280-339, 496-555, 620-677
Apply transformations and use symmetry to analyze mathematical situations	
1. understand and represent translations, reflections, rotations, and dilations of objects in the plane by using sketches, coordinates, vectors, function notation, and matrices;	18-31, 296-303, 620-625, 699-716, 740-741

2. use various representations to help understand the effects of simple transformations and their compositions.	18-31, 296-303, 620-625, 699-716, 740-741
Use visualization, spatial reasoning, and geometric modeling to solve problems	
1. draw and construct representations of two- and three-dimensional geometric objects using a variety of tools;	85-92, 97-113, 149-150, 153-154, 174, 297, 307-311, 337, 558, 570, 579, 586-600, 635-636, 646, 664-677, 680-741
2. visualize three-dimensional objects and spaces from different perspectives and analyze their cross sections;	107-113, 174, 337, 558, 579, 664-677
3. use vertex-edge graphs to model and solve problems;	532-533, 540-543, 651
4. use geometric models to gain insights into, and answer questions in, other areas of mathematics;	85-92, 97-113, 149-150, 153-154, 174, 297, 307-311, 337, 558, 570, 579, 586-600, 635-636, 646, 664-677, 680-741
5. use geometric ideas to solve problems in, and gain insights into, other disciplines and other areas of interest such as art and architecture	85-92, 97-113, 149-150, 153-154, 174, 297, 307-311, 337, 558, 570, 579, 586-600, 635-636, 646, 664-677, 680-741
MEASUREMENT STANDARD	
The student should be able to:	
Understand measurable attributes of objects and the units, systems, and processes of measurement	
1. make decisions about units and scales that are appropriate for problem situations involving measurement.	24-25, 37-77, 87-143, 185-203, 262-277, 280-339, 342-387, 390-434, 537-555, 657-677, 680-741
Apply appropriate techniques, tools, and formulas to determine measurements	
1. analyze precision, accuracy, and approximate error in measurement situations;	114-121, 262-277, 537-555, 657-677
2. understand and use formulas for the area, surface area, and volume of geometric figures, including cones, spheres, and cylinders;	85-143, 185-203, 262-277, 280-339, 657-677, 680-741
3. apply informal concepts of successive approximation, upper and lower bounds, and limit in measurement situations;	537-555, 657-677
4. use unit analysis to check measurement computations.	24-25, 37-77, 87-143, 185-203, 262-277, 280-339, 342-387, 390-434, 537-555, 657-677, 680-741
DATA ANALYSIS and PROBABILITY STANDARD	
The student should be able to:	
Formulate questions that can be addressed with data and collect, organize, and display relevant data to answer them	
1. understand the differences among various kinds of studies and which types of inferences can legitimately be drawn from each;	61-72, 262-277, 314-316, 320-322, 342-387, 390-439, 505, 518, 536, 537-555
2. know the characteristics of well-designed studies, including the role of randomization in surveys and experiments;	320, 342-387, 390-439, 505, 518, 536, 537-555
3. understand the meaning of measurement data and categorical data, of univariate and bivariate data, and of the term variable;	44-53, 80-84, 262-277, 314-316, 320-322, 342-387, 390-439, 505, 518, 536, 537-555
4. understand histograms, parallel box plots, and scatter plots and use them to display data;	397-419, 505, 518

5. compute basic statistics and understand the distinction between a statistic and a parameter.	262-277, 342-387, 390-439, 505, 518, 536, 537-555
Select and use appropriate statistical methods to analyze data	
1. for univariate measurement data, be able to display the distribution, describe its shape, and select and calculate summary statistics;	61-72, 390-439, 505, 518, 536, 537-555, 656
2. for bivariate measurement data, be able to display a scatter plot, describe its shape, and determine regression coefficients, regression equations, and correlation coefficients using technological tools;	262-277, 301, 313-316, 320, 404-410
3. display and discuss bivariate data where at least one variable is categorical;	404-410, 505, 518
4. recognize how linear transformations of univariate data affect shape, center, and spread;	296-303, 620-625
5. identify trends in bivariate data and find functions that model the data or transform the data so that they can be modeled.	262-264, 301, 314-316, 320, 404-419, 505, 518, 537-555
Develop and evaluate inferences and predictions that are based on data	
1. use simulations to explore the variability of sample statistics from a known population and to construct sampling distributions;	55-56, 349-355, 420-425, 505, 518, 536, 537-555, 656
2. understand how sample statistics reflect the values of population parameters and use sampling distributions as the basis for informal inference;	342-387, 390-439, 505, 518, 536, 537-555,
3. evaluate published reports that are based on data by examining the design of the study, the appropriateness of the data analysis, and the validity of conclusions;	55-56, 342-387, 390-439, 505, 518, 536, 537-555, 656
4. understand how basic statistical techniques are used to monitor process characteristics in the workplace.	55-56, 342-387, 390-439, 505, 518, 536, 537-555, 656
Understand and apply basic concepts of probability	
1. understand the concepts of sample space and probability distribution and construct sample spaces and distributions in simple cases;	342-387, 536, 574, 648
2. use simulations to construct empirical probability distributions;	342-387, 505, 518, 537-555, 574, 648
3. compute and interpret the expected value of random variables in simple cases;	342-387, 505, 518, 648
4. understand the concepts of conditional probability and independent events;	356-387, 505, 518, 536, 574, 648
5. understand how to compute the probability of a compound event.	356-367, 377
PROBLEM SOLVING STANDARD	
Students should be able to:	
1. build new mathematical knowledge through problem solving;	Throughout the book. Examples: 7-8, 11-12, 16-17, 24-25, 29-30, 35-36, 42-43, 76-77, and similar assessments for the other 11 chapters.
2. solve problems that arise in mathematics and in other contexts;	Throughout the book. Examples: 7-8, 11-12, 16-17, 24-25, 29-30, 35-36, 42-43, 76-77, and similar assessments for the other 11 chapters.
3. apply and adapt a variety of appropriate strategies to solve problems;	Throughout the book. Examples: 7-8, 11-12, 16-17, 24-25, 29-30, 35-36, 42-43, 76-77, and similar assessments for the other 11 chapters.

4. monitor and reflect on the process of mathematical problem solving	Throughout the book. Examples: 7-8, 11-12, 16-17, 24-25, 29-30, 35-36, 42-43, 76-77, and similar assessments for the other 11 chapters.
REASONING and PROOF STANDARD Students should be able to:	
1. recognize reasoning and proof as fundamental aspects of mathematics;	Throughout the book. Examples: 5-7, 9-12, 23, 26, 40-41, 83, 85-86, 115-116, 147-151, 161-166, 221-222, 241-244, 280-294, 305-308, etc.
2. make and investigate mathematical conjectures;	Throughout the book. Examples: 5-7, 9-12, 23, 26, 40-41, 83, 85-86, 115-116, 147-151, 161-166, 221-222, 241-244, 280-294, 305-308, etc.
3. develop and evaluate mathematical arguments and proofs;	Throughout the book. Examples: 5-7, 9-12, 23, 26, 40-41, 83, 85-86, 115-116, 147-151, 161-166, 221-222, 241-244, 280-294, 305-308, etc.
4. select and use various types of reasoning and methods of proof	Throughout the book. Examples: 5-7, 9-12, 23, 26, 40-41, 83, 85-86, 115-116, 147-151, 161-166, 221-222, 241-244, 280-294, 305-308, etc.

COMMUNICATION STANDARD Students should be able to:	
1. organize and consolidate their mathematical thinking through communication;	Throughout the book. See "Critical Thinking" exercises found in many lessons, Example: 11, 21, 29, 33, 37, 40, etc. Also, "Think and Discuss" sections in every Lesson Assessment and Math Labs (usually three at the end of each chapter).
2. communicate their mathematical thinking coherently and clearly to peers, teachers, and others;	Throughout the book. See "Critical Thinking" exercises found in many lessons, Example: 11, 21, 29, 33, 37, 40, etc. Also, "Think and Discuss" sections in every Lesson Assessment and Math Labs (usually three at the end of each chapter).
3. analyze and evaluate the mathematical thinking and strategies of others;	Throughout the book. See "Critical Thinking" exercises found in many lessons, Example: 11, 21, 29, 33, 37, 40, etc. Also, "Think and Discuss" sections in every Lesson Assessment and Math Labs (usually three at the end of each chapter).
4. use the language of mathematics to express mathematical ideas precisely.	Throughout the book. See "Critical Thinking" exercises found in many lessons, Example: 11, 21, 29, 33, 37, 40, etc. Also, "Think and Discuss" sections in every Lesson Assessment and Math Labs (usually three at the end of each chapter).

CONNECTIONS STANDARD Students should be able to:	
1. recognize and use connections among mathematical ideas;	Throughout the book. See lists on pages iii-viii. Also, Math Labs and Math Applications on pages (ff) CH. 1: 54, 59, CH. 2: 122, 128, CH. 3: 185, 190, CH. 4: 260, 265, CH. 5: 320, 323, CH. 6: 374, 378, CH. 7: 426, 430, CH. 8: 476, 481, CH. 9: 537, 544, CH. 10: 607, 611, CH. 11: 657, 664, CH. 12: 722, 728.
2. understand how mathematical ideas interconnect and build on one another to produce a coherent whole;	Throughout the book. See lists on pages iii-viii. Also, Math Labs and Math Applications on pages (ff) CH. 1: 54, 59, CH. 2: 122, 128, CH. 3: 185, 190, CH. 4: 260, 265, CH. 5: 320, 323, CH. 6: 374, 378, CH. 7: 426, 430, CH. 8: 476, 481, CH. 9: 537, 544, CH. 10: 607, 611, CH. 11: 657, 664, CH. 12: 722, 728.

3. recognize and apply mathematics in contexts outside of mathematics.	Throughout the book. See lists on pages iii-viii. Also, Math Labs and Math Applications on pages (ff) CH. 1: 54, 59, CH. 2: 122, 128, CH. 3: 185, 190, CH. 4: 260, 265, CH. 5: 320, 323, CH. 6: 374, 378, CH. 7: 426, 430, CH. 8: 476, 481, CH. 9: 537, 544, CH. 10: 607, 611, CH. 11: 657, 664, CH. 12: 722, 728.
--	--

REPRESENTATION STANDARD

Students should be able to:

1. create and use representations to organize, record, and communicate mathematical ideas;	Throughout the book.
2. select, apply, and translate among mathematical representations to solve problems;	Throughout the book.
3. use representations to model and interpret physical, social, and mathematical phenomena.	Throughout the book.
